

FREQUENTLY ASKED QUESTIONS

1. What should I bring to my appointment?

First of all, bring any questions you have about your eye health! Also, bring a copy of your medical and vision insurance cards. If you are a contact lens wearer, please wear your contacts to your appointment and bring your current box or labels. This is the best way for us to determine if your eyes are changing!

2. Do you see children?

Yes! We start seeing children after the age of four. If you have questions about this, please text or call our office.

3. How much does an eye exam cost?

A routine eye exam for a new patient ranges from \$190 to \$225 and ranges from \$165 to \$225 for established patients. Many patients have vision or medical insurance that offsets these costs.

4. What insurances do you accept?

We are in network with most VSP and EyeMed plans, as well as Community Eye Care, Physicians Eyecare Plan and other vision plans. We are also in network with several major medical plans. We can discuss this further when you call to make your appointment.

5. Will I be okay to drive home?

While dilation of the pupils is sometimes necessary and can cause blurred vision, not all patients react the same way. We advise bringing a driver if you have never been dilated before.

6. Can I pick out glasses at my visit?

Yes! We prioritize our patients who are here for exams and need to pick out glasses. For most people, this process takes 15-30 minutes.
